

TMPWG SEPTEMBER 19, 1997 MEETING SUMMARY MINUTES

Final , October 15, 1997

Attendees: Members:

Tom Bach, Dave Fashimpaur, Terry Harrison, Dennis Knisley, Farhana Mohamed, Lawrence Otwell, Bill Passie, John Preczewski, Dave Schanbacher, Vernon Schievelbein, Sirish Shimpi, Jim Wright, Tom McGrath (new member)

Other Public participants: None

Discussion, Conclusions, and action items:

RICE subgroup sampling program costs:

Without specific details a refined cost estimate is not possible to determine. With given assumptions \$150,000 appears to be a reasonable planning figure, without significant travel/site obstacles. It should be noted that validation issues are not addressed in this cost estimate.

Detection Limit Document:

With minor rewording the TMPWG guidance on interpreting/utilizing a data base containing non-detect values was approved for release to all source work groups. David Schanbacher will develop a flowchart for distribution as a follow-up.

Real Time Test Methods:

This is a new issue. Does the TMPWG provide guidance to source work groups on data validation for any proposed data gathering test programs? While the exact nature of the guidance was not determined, consensus was reached that the workgroups, at a minimum, should be made aware of the problems that may arise from a lack of, or an insufficient, validation program. This issue is to be revisited.

TMPWG Leadership:

Consensus that Dennis Knisley, Farhana Mohamed, and Tom Bach remain in the roles of Co-chair and alternates. Terry Harrison to query the three concerning any desire to interchange roles amongst the three.

Member Participation:

Terry Harrison to canvas individual members of the TMPWG to identify any desire to be removed from the group. Source workgroup coverage was completed by having Thomas McGrath agree to represent TMPWG on the boiler source work group.

ICCR emissions database:

F. Mohamed distributed a draft copy for comment. Comments are sought within one week. (Due 9/26/97)

PICS document:

Tom McGrath to look at the CARB Air Toxics Summary Report to determine if there is any information regarding expected PICs/HAPs emission and convey to Dennis Knisley. The HAPs list

will be revised as necessary if and when additional information becomes available. D. Knisley to prepare short explanation to the Coordinating Committee.

Next Meetings:

Phone conference October 21, 1997 at 11:00 am-12:30 pm, eastern standard time. Call in #919-541-4154. T. Harrison is to develop agenda.

Face to Face Meeting tentatively scheduled for Friday, November 21, 1997 in Houston TX @ the Red Lion Hotel (CC meeting site). T Harrison to make arrangements for room.

Recorder: John Preczewski
